83. Implant according to claim 76, wherein material is a plastic.

84. Implant according to claim 76, wherein material is a silicone rubber.

85. Implant according to claim 76, wherein the material comprises polydimethylsiloxane.

86. Implant according to claim 76, wherein the material is a polysaccharide.

87. Implant according to claim 83, wherein the plastic is cuprophane.

88. Implant according to claim 76, wherein the material has a foam structure.

89. Implant according to claim 76, wherein an X-ray contrast medium or a dye is incorporated into the material.

90. Implant for the reconstruction of soft tissue, said implant comprising: a plurality of spaghetti-like strands, said strands being made of a physiologically compatible material having a surface that is wettable by a fluid lubricant.

91. Implant according to claim 90, wherein said implant has a hydrophilized surface.

92. Implant according to claim 90, wherein the surface is hydrophilized surface and the lubricant is aqueous.

93. Implant according to claim 90, wherein the fluid lubricant is swellable.

94. Implant according to claim 90, wherein the fluid lubricant is a polysaccharide or glucosaminoglycan.

95. Implant according to claim 90, wherein a surface of the implant is hydrophobic.

96. Implant according to claim 90, wherein said implant contains fat or oil wetting the hydrophobic surface as the fluid lubricant.

97. Implant according to claim 90, wherein material is a plastic.

98. Implant according to claim 90, wherein material is a silicone rubber.

99. Implant according to claim 90, wherein the material comprises polydimethylsiloxane.
